	Ruth's Birthday		Call Dr. Thorne			

## **Teacher's Notes**

### **Pronunciation point: /θ/ and /s/**

Have students work in pairs. Each partner looks at a different calendar. (Cut the copies in half or have students fold the paper in half and just look at one calendar.) Students should not look at their partner's calendar.

The partners ask each other questions to try to find a day when they're both free to do something together. (Have lunch? Go to the beach? Elope to Las Vegas?) Point out that the events on the calendars have lots of /θ/ and /s/ sounds. Encourage them to say the dates, most of which also have /θ/: fourth, fifth, etc.
